

Sprint 4 second meeting

Topic: Api language and Jenkins

Persons attended: Kangming Xu & Gefei Tian

Kangming Xu & Gefei Tian meet together to discuss what language they will use for the api. Originally, they want to use Python to write the api. However, they found it was hard to write Jenkin test for Python based api. Therefore, they decided to use Java to write the api. They also created the java program that read the input file, which was an excel file. They also created the test for the readFile program.
